

EVERYONE HAS A STORY.

Consider being a part of the Hepatitis B Foundation's Storytelling project. This workshop will bring together individuals living with or affected by hepatitis B to learn how to share their stories to educate the public about the disease and to promote hepatitis B screening, prevention, and care. The workshop will be held in Spring/Summer 2019.

Becoming a storyteller is an empowering experience and opportunity to connect with others like you, while inspiring change and breaking down stigma.
