

Support the Cause

We Need Your Help To Continue Our Important Work!

The Hepatitis B Foundation is the only volunteer nonprofit organization dedicated to the cause and cure of chronic hepatitis B. Each year thousands of people contact us for information, support, and referrals for this serious liver disease. In response, we have established a telephone helpline, publish a free english newsletter, maintain this website, and sponsor educational events. In addition, we fund an active research lab searching for a cure for chronic hepatitis B.

As a tax-exempt charitable organization, we depend on individual donations to fund our activities. We invite each of you to support the Hepatitis B Foundation by making a generous donation today. Giving hope to millions is as easy as giving.

Thank you!

To make a donation, please click [Support the Cause](#) which will take you to the English Form on our main website.
