

Hep B United

A national campaign to eliminate
hepatitis B and liver cancer

National and Local Community Partners

Hep B United works to support and leverage the success of local community coalitions that include health departments, healthcare providers, political leaders, students and individuals living with hepatitis B across the country.

Hep B United was co-founded and is co-chaired by the Hepatitis B Foundation and the Association of Asian Pacific Community Health Organizations (AAPCHO). The coalition works to reduce the impact of hepatitis B through prevention and education efforts, addressing perinatal transmission, improving screening and linkage to care, contributing to national surveillance data, and advocating on a national level.
