

Locating Clinical Trials

How can I locate a Clinical Trial near me?

The clinical trials website is a global database of privately and publicly funded clinical studies. The website is managed by the National Institutes of Health U.S. National Library of Medicine. This is an excellent resource for finding studies in all 50 U.S. states and in 201 countries around the world. Before participating in a clinical trial, it is important to get information about the [potential risks and benefits](#).

You can search for clinical trials using the National Institutes of Health's [website](#). Steps to navigating the website are listed below.

To search the clinical trials database manually, follow these steps:

1. Visit www.clinicaltrials.gov, and you will see the screen below:

The image shows the ClinicalTrials.gov homepage. At the top, there is a navigation bar with the NIH logo and the text "U.S. National Library of Medicine". Below this is the "ClinicalTrials.gov" logo. To the right of the logo are several links: "Find Studies", "About Studies", "Submit Studies", "Resources", and "About Site". Below the navigation bar is a blue banner with the text: "ClinicalTrials.gov is a database of privately and publicly funded clinical studies conducted around the world." Below the banner, on the left, is a section titled "Explore 263,184 research studies in all 50 states and in 201 countries." followed by a paragraph: "ClinicalTrials.gov is a resource provided by the U.S. National Library of Medicine." Below this is an "IMPORTANT" notice: "Listing a study does not mean it has been evaluated by the U.S. Federal Government. Read our [disclaimer](#) for details." Below the notice is another paragraph: "Before participating in a study, talk to your health care provider and learn about the [risks and potential benefits](#)." On the right side of the page is a search box titled "Find a study (all fields optional)". Inside the search box, there are four sections: "Recruitment status" with two radio buttons, "Condition or disease" with a text input field, "Other terms" with a text input field, and "Country" with a dropdown menu. At the bottom of the search box are two buttons: "Search" and "Advanced Search".

☒ All studies

Condition or disease (For example: breast cancer)

Other terms (For example: NCT number, drug name, investigator name)

Country

Search [Advanced Search](#)

2. Search for hepatitis B clinical trials

Under the “Search” section, in the “Condition/Disease” box, input ‘hepatitis B.’

You may also choose to input ‘HBV’ and/or ‘hep B’ into the “Other Terms” section, to be sure to pick up studies that refer to hepatitis B by another name.

In the “Other terms” section, you can even input a specific trial number or drug name to narrow your search.

In the “Country” section, enter your location. If you are in the U.S., you can also include the state and city where you live. For other countries, you may list a city. You can also include a specified distance with the number of miles from your specified location. (Note: It may be necessary to expand your search beyond your local area in order to find a trial.) Click “Search” to see your search results.

3. Narrow your search by recruitment status

There are many filters, but the most helpful for you will be “Recruitment status, which provides the best options for currently active clinical trials including:

- “Not yet recruiting”
- “Recruiting”
- “Enrolling by invitation”
- “Active, not recruiting”

If you are looking for a trial to join immediately, “recruiting” would be the best option, although it may be useful to be aware of trials that will soon be recruiting, or studies that are not recruiting, but have active participants. It is always helpful to know where there may be leading hepatitis B research and expertise near you.

Before narrowing your search further, it is important to know your disease specifics so that you can use additional filters. You will see filters that will help you narrow your search on the left side of the page. Some filters include “[eligibility criteria](#)” (age, gender, etc.) and “[study type](#).”

Narrowing your Search Further

You will see filters that will help you narrow your search on the left side of the page. Filters include “[eligibility criteria](#)” (age, gender, etc.), “[study type](#),” “Study Results”, “Study Phase” and “Study Funder”. Across the top are additional search options: “By Topic”, “On Map”, and “Search Details”. These additional filtering options narrow your search further, though you will find fewer search results, or possibly no available trials if you are too specific.

By Topic

Topics help to narrow your search by the specifics of your individual health condition. Available topics include: "Conditions," "Rare Diseases," "Drug Interventions," "Dietary Supplements," and "Sponsor/Collaborators." "Conditions" is the default when you select "By Topic". If you have hepatitis B and fibrosis, you can use the "fibrosis" filter to narrow your search. Click on "Drug Interventions" and page through listings to find clinical trials specific to HBV and the selected drug, such as entecavir, tenofovir or others. Click on "Dietary Supplements" and select options such as milk thistle, vitamin D or others to find trials pertaining to hepatitis B and the selected supplement.
